11th Computer Science

PUBLIC EXAM ANSWER KEY MARCH - 2023

1 Marks:

1. A) RAM
2. D) A
3. C) VGA Connector
4. D) All the above
5. A) Shift and delete
6. B) Specification
7. C)\n
8. A) 20
9. A) main()
10. B) It will not allocate any memory / C) It will be only declared.
11. B) OOP
12. B) Inline functions
13. D) The return type is also considered for overloading a function
14. A) Constructor
15. D) Warez

2Marks:

17. Answer: 100011_2

24. Output:

    87.2525
    87

3 Marks:

33. Program:

```
#include<iostream>
using namespace std;
int main()
{
        for(int i=1;i<=10;i++)
        {
                if(i==5)
                        continue;
                else
                        cout<<i<<"\t";
        }
}
```

5 Marks:

37. b)

Line 5: [Error] **Char – Datatype in variable declaration must be in lowercase.**

If it is "char", output is

Monitor

Speaker

Printer

Scanner

Keyboard

38. a) Different types of Cyber attacks

Question asked in Deleted Portion.

b)

Line No.	Error	Correction
1	$include<iostream>	#include<iostream>
3	class base()	class base
5	public	public:
10	!base()	~base()
13	};	}
14	}	};
15	Class derived :: public base	class derived : public base
17	public	public:
22	!derived()	~derived()
27	Class derived1:: public derived	class derived1 : public derived
30	derived1();	derived1()
34	derived1();	~derived1()
38	}	};
39	int main();	int main()
